PROG6212 POE Support Session

BY NAIYA HARIBHAI AND
LEIGHCHE JAIKARRAN

agenda.

- Referencing and code attribution
- General Guidelines
- External Libraries Guidelines
- Demo
- Questions

Referencing

- When referencing sources that are not a part of your code attribution, you may reference those sources in your readMe file in your GitHub repository.

References

Atiris. 2014. How do I determine if a date lies between current week dates?, 6 February 2014. [Online]. Available at: <https://stackoverflow.com/questions/21598365/how-do-i-determine-if-a-date-lies-between-current-week-dates>

[Accessed 19 September 2023].

B.S. 2021. How can I insert the current logged in user into a database using ASP.NET Core?, 21 January 2021. [Online]. Available at: <https://stackoverflow.com/questions/65824768/how-can-i-insert-the-current-logged-in-user-in-a-database-using-asp-net-core> [27 November 2023].

code attribution.

```
LINE 1: //Code attribution  
LINE 2: //This code has been adapted from {website name}  
LINE 3: //{{link to website}}  
LINE 4: //{{Author/Blogger's username}}  
LINE 5: //{{link to author/blogger's profile}}
```

general guidelines.

- Use Entity Framework for database interactions
- Use MVC for your application
- Implement ASP.NET Identity for user authentication and authorisation
- Commit to your GitHub repository regularly and at least 10 times (ensure that you enter descriptive messages when committing)
- Include all features of your app (even from part 1 and 2) in your video presentation
- You don't need split your app into an API and a client
- Remember to add in how you addressed lecturer feedback in a Word Doc

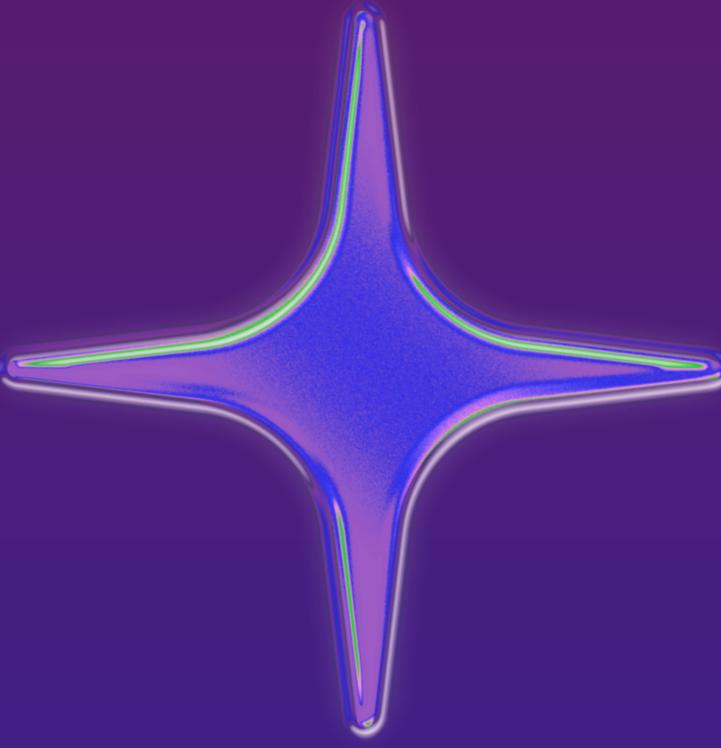

external libraries guidelines.

- Integrate reporting libraries like Crystal Reports or SQL Server Reporting Services (SSRS).
- Windows Workflow Foundation or third party libraries such as FluentValidation are helpful (they function similar to LINQ and can help for validation)

demo.

Questions?

**THANK
YOU**
